

SIMPLE STRETCHY SLIME

INGREDIENTS:

½ CUP LIQUID STARCH

½ CUP WATER

½ CUP WHITE SCHOOL GLUE

FOOD COLORING, GLITTER, OR OTHER SMALL ADD INS TO CUSTOMIZE YOUR SLIME

DIRECTIONS:

1. Mix the water and glue in a medium-large sized bowl. Mix it until it is completely combined. Tip from the campers: your mixture should look like runny milk, but don't drink it.
 2. Add in any food coloring, glitter, sequins, or other small items and mix well. Tip from the campers: glitter is more fun than food coloring because it doesn't stain your hands or clothes and makes everything sparkle, and we mean EVERYTHING.
 3. Once everything else is completely mixed, add in your liquid starch. Your mixture will immediately start to look stringy. Keep mixing. After things are a little less runny, feel free to use your hands to continue the mixing process. Tip from the campers: it will be stringy at first, but don't give up! The more you play with it the better it feels.
 4. Have fun! Slime will keep in a zip-top baggie for a couple days. We recommend keeping it on hard surfaces and away from faces and pets. The glitter, if you chose it, will linger for eternity.
